WINPACT FERMENTER

(Tank Design)

Medium-free: Sanitary
SUS 304

Premium German-made
Borosilicate Glass

2:1 or 3:1 (air lifting)
H/D Ratio
ideal for
mixing & homogeneity

In contact to medium:
Sanitary SUS 316L

WINPACT FERMENTER (Tank Design)

Impeller: Mixing & Breaking up bubbles

Rushton
(Disk)

Pitched Blade (Segment) (Customizable)

Baffle: Convert flow of fluid radial motion into axial

Sparger: Breaking up & distribute bubbles from the bottom

Pilot scale-10L/30L/50L Production scale-100L~10T SIP : Sterilization in Place

WINPACT SIP System

► Introduction

- Main difference between bench-top system and SIP system
→ **Sterilization**
Bench-top: Put the vessel into the autoclave
- **SIP: Sterilization in Place (By machine itself!!)**
To achieve atomization → Pneumatically controlled valves

▶ Component Description

▶ Sectional view

▶ Component Description

▶ Dimple jacket

- ▶ Better heat transfer characteristics due to turbulence generated by the dimples

Dimple jacket

► Utility Requirements

Air compressor

Air Dryer

Chiller

Steam Generator

▶ Component Description

▶ Inoculation/feeding port

- Four inoculation/feeding ports available on the headplate

SIP system: Specification

Mechanical Seal:

- Double layered
- Liquid lubrication and cooling
- Automatically refilled

Mechanical foam breaker

Rushton impellers:

- SUS316L ($\leq 20 \mu\text{-in}$)
- Rushton impeller (4 or 6-blades)
- Height adjustable

▶ **Component Description**

▶ **Bottom harvest valve**

- Steam sterilization before harvesting

SIP-50L

Application: BHK21 cell

▶ Component Description

- ▶ Headplate lifter

- Wheel and axle for lifting the headplate with minimum labor

► Production Scale Fermentors (From 100L to 10ton)

Designed for large scale production

Sterilized by external steam (faster & efficient)

SIP-500L

SIP-1000L

Headplate capsule design (200L up)

ASME BPE Pneumatic valve

ASME BPE Standard bottom valve
(The same level)

Watson-Marlow Peristaltic
Pumps (The same level)

SUS
316L/304
Piping

SUS 316L
Vessel

Rushton Pitched Blade (Customization)

Device for downstream

**High speed
tubular system**

**Filter system
equipment**

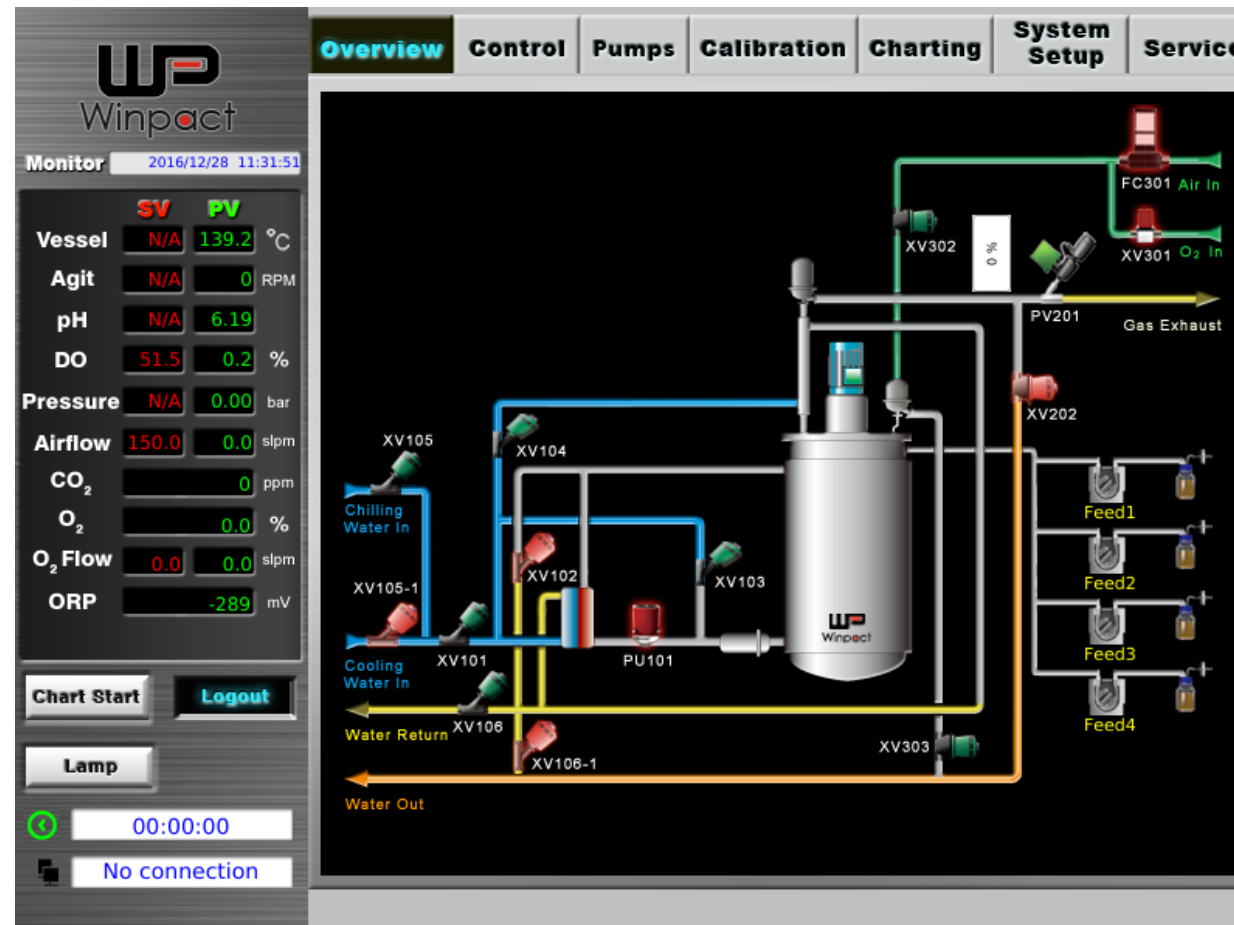

**Customized
equipment**

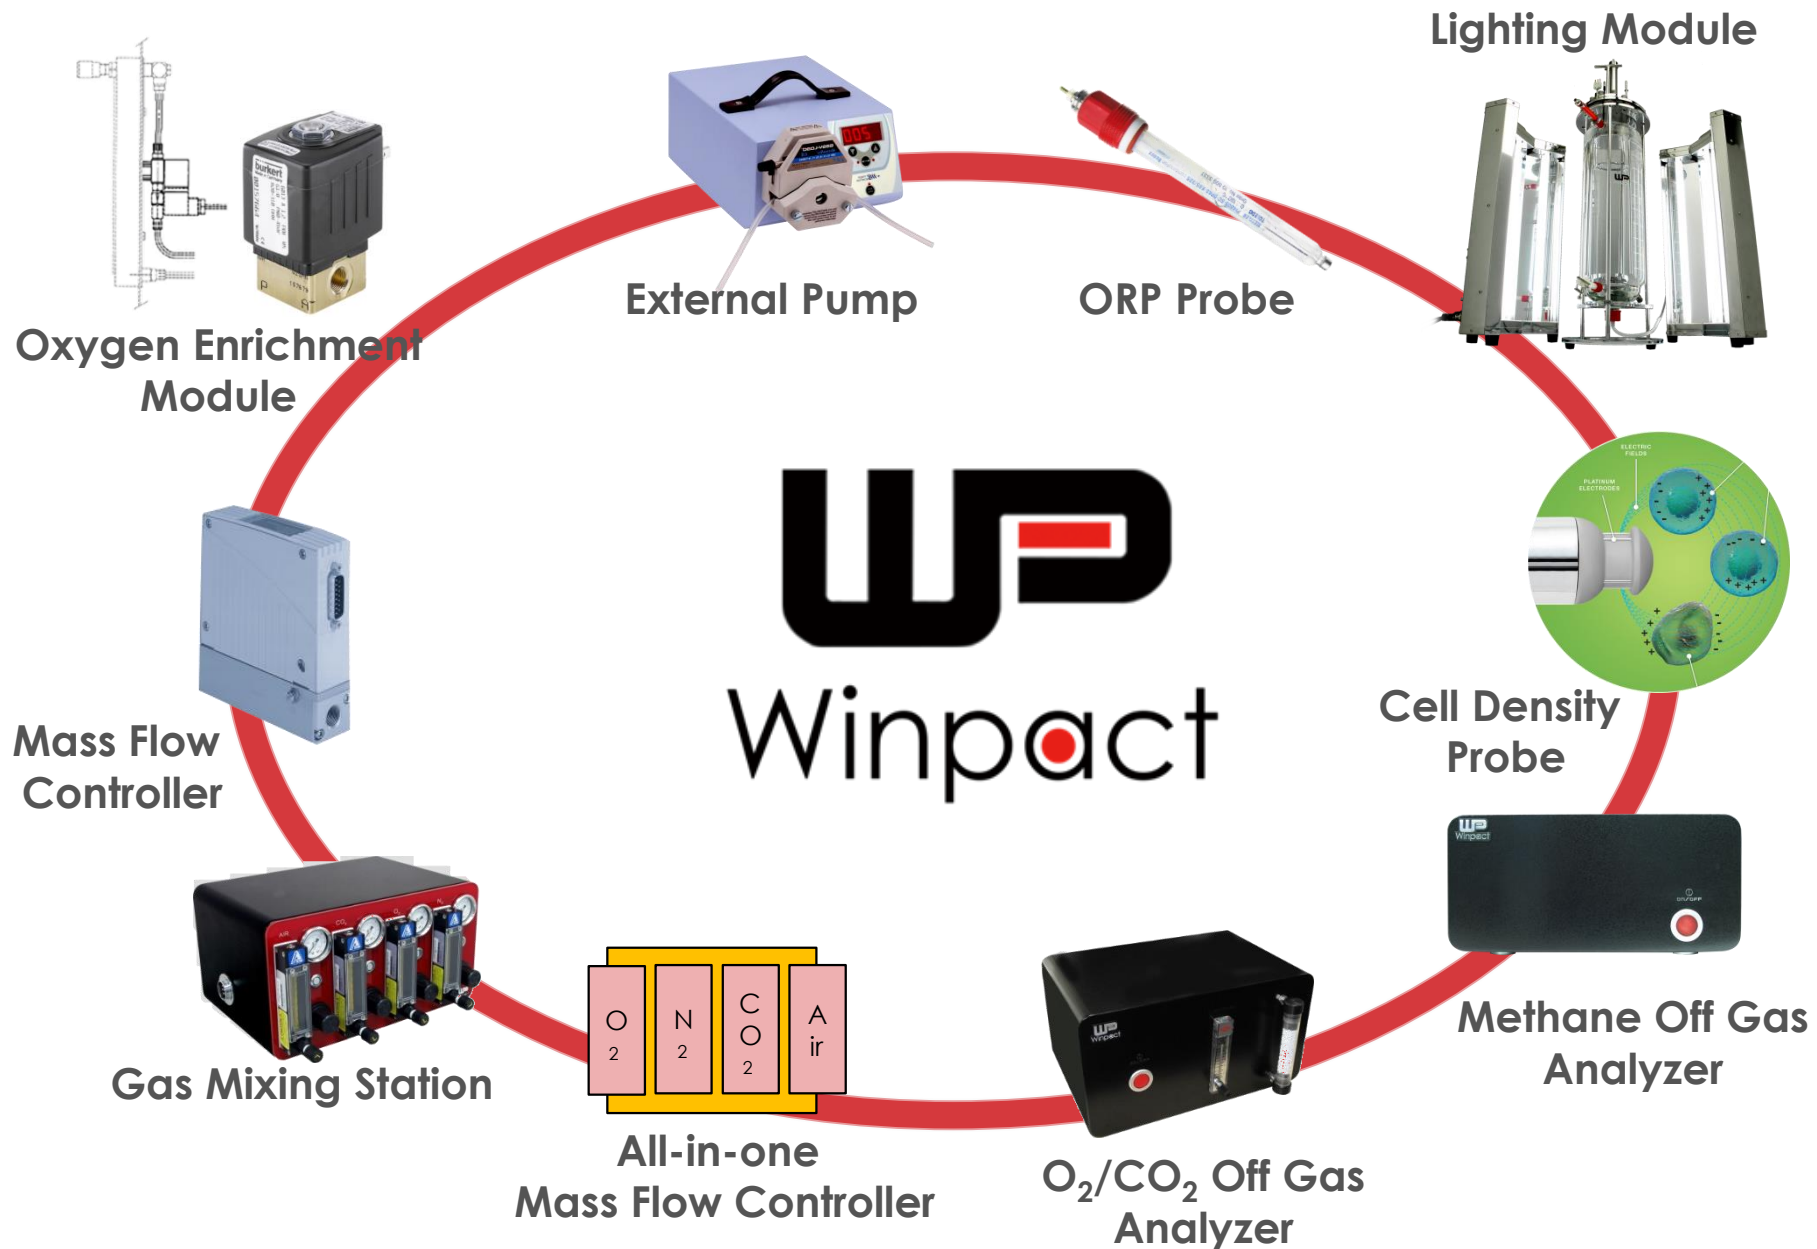

▶ Control Interface

▶ User-friendly, graphical control interface

- Real-time display of vessel set point parameters and conditions
- Monitor the process immediately

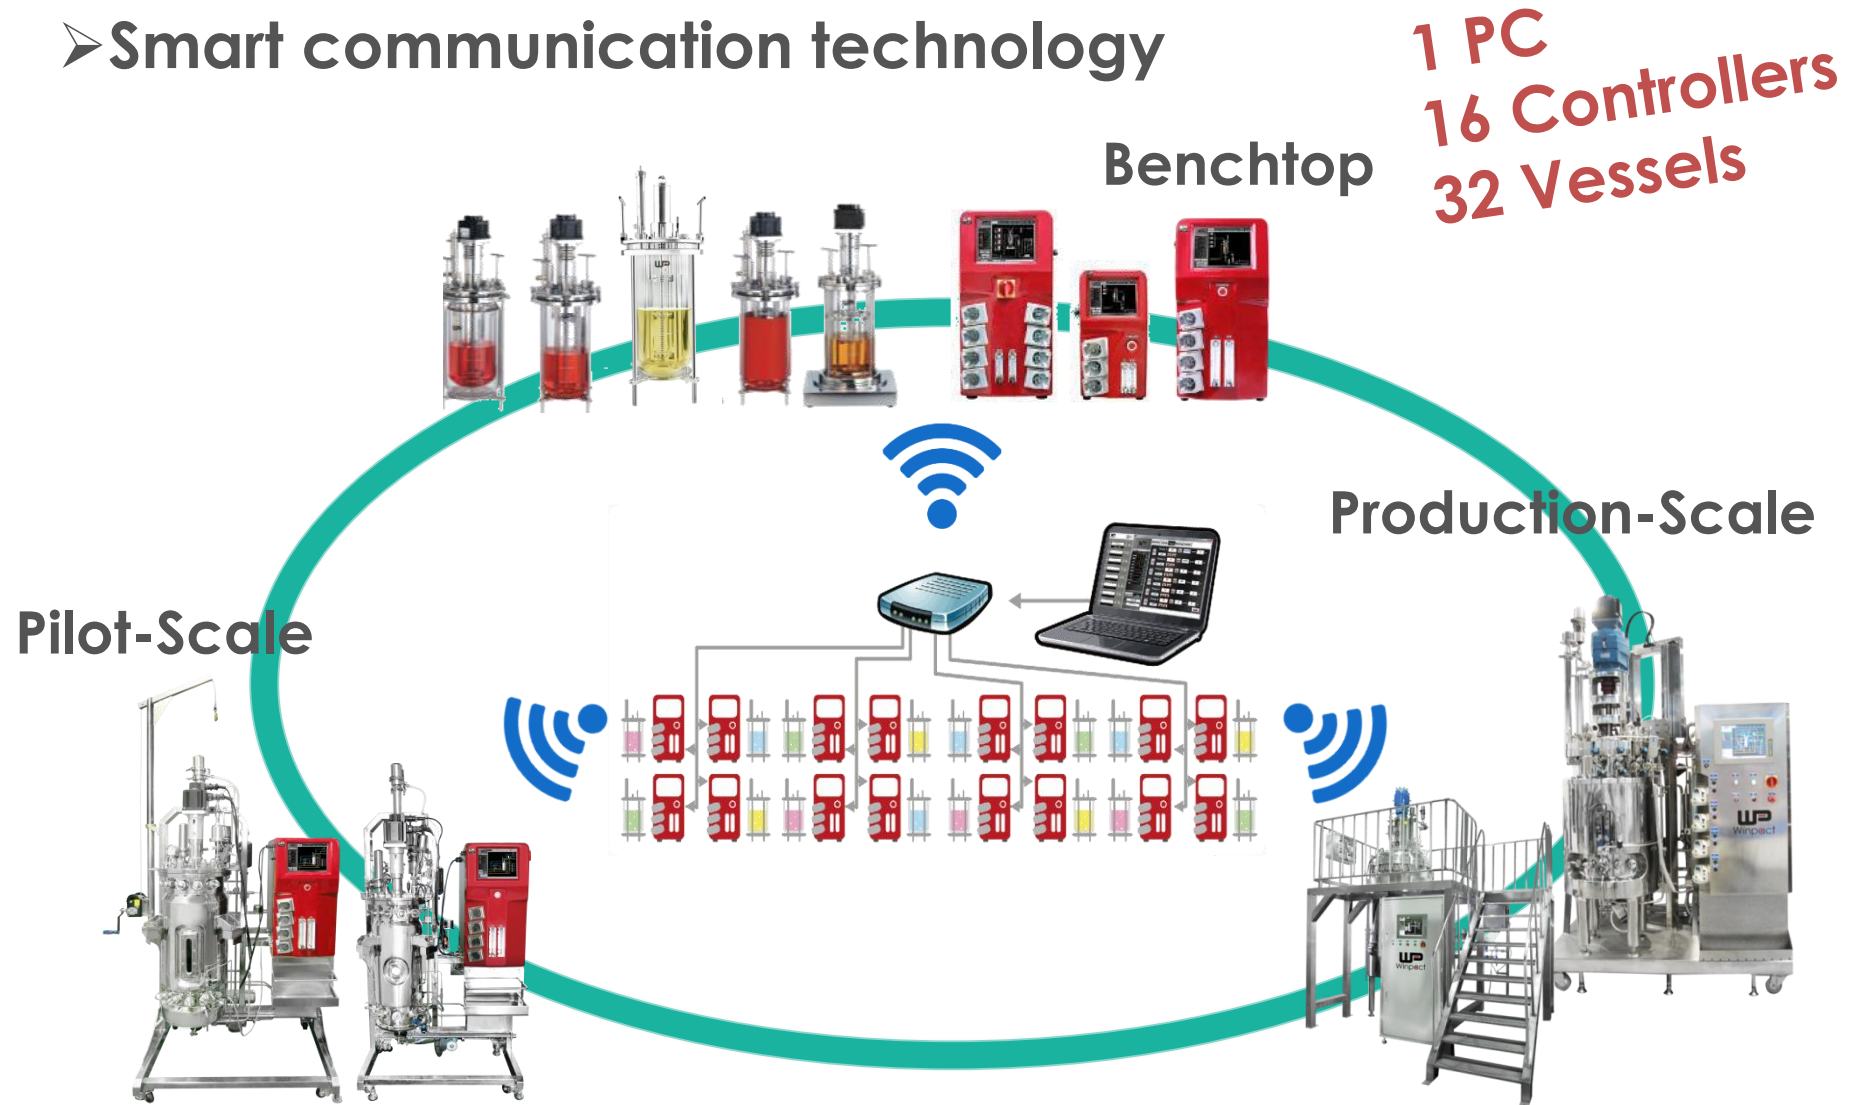

► Optional Devices

▶ Remote Control

➤ Smart communication technology
