

MUPY's Department of Manufacturing Pharmacy hosted a seminar on 'Non-destructive Analysis for Pharmaceutical and Biomedical Applications'

August 20, 2018

On August 20, 2018, Assoc. Prof. Dr. Satit Puttipatkhachorn, Chairman of Department of Manufacturing Pharmacy, welcomed Asst. Prof. Dr. Robert Pal, an invited speaker from Department of Chemistry, Durham University, United Kingdom, who was officially invited to join a collaborative seminar on 'Non-destructive Analysis for Pharmaceutical and Biomedical Applications' hosted by MUPY's Department of Manufacturing Pharmacy. The seminar was also supported by Centre of Excellence on Medical Biotechnology, Thailand Research Fund, and Mahidol University's Faculty of Pharmacy. On this occasion, Asst. Prof. Dr. Robert Pal also delivered lectures entitled "A simple screening marker for prostate cancer" and "Light-driven unidirectional molecular machines as targeted photodynamic therapy agents" to the audiences who were MUPY faculty members and graduate students as well as those who came from partner institutions.
