

MUPY Community Pharmacy provided basic pharmacy education on drug allergy to the community.

May 20, 2009

MUPY Community Pharmacy provided a basic pharmacy education on drug allergy to the community. This education opportunity is free of charge to express our sense of social responsibility. The lecturer for this topic was Assistant Professor Pramote Trakulpienkit, an expert in adverse drug reaction. To commemorate the 40th anniversary of the bestowal of Mahidol as the university name, MUPY Community Pharmacy holds a free education program for the community monthly from May to September 2009.
