

MUPY held a public education even on safe and appropriate use of antibiotics

June 27, 2009

MUPY joined hand with the MUPY Foundation in holding a public education event on Safe and Effective Use of Antibiotics. This event aimed to tackle the inappropriate use of antibiotics in the community which may play an important role in the development of drug resistant microorganism and increase unnecessary cost of care for the country. This event has received great interest from the community and served as the testament for MUPY dedication to promote safe and effective drug use in the community.
