

MUPY provides education to public on how to effective use medicinal plants against flu

Aug 25, 2009

Due to the recent outbreak of H1N1 2009 flu, many have resorted to medicinal plants. MUPY therefore aims to education the public about how to effectively use medicinal plant against flu. This is a part of MUPY determination to serve the public and promote safe and effective use of drugs, medicinal plants and other related health products. This event was a resounding success with hundreds of participants joining the meeting. This event was also broadcasted through national medias.
