

Special lectures on Molecular dynamics simulations and molecular docking studies.

Jan 04, 2011

MUPY held the special lectures on Molecular dynamics simulations and molecular docking studies. The Department of Pharmaceutical Chemistry, MUPY held the special lectures on “Molecular dynamics simulations and molecular docking studies during 4-7 January 2011. The focus of this conference is to provide an in-depth, comprehensive overview of the molecular dynamics simulations and molecular docking techniques in drug development. The arrangement of the conference comprises of invited lectures and tutorials. Over 100 lecturers, researchers, postdoctoral fellows, and graduate students from international and nationwide participated in the event.□□
